SUMMARY

Computer Science undergraduate at BIT Mesra with strong foundations in data structures, DBMS and Python, and hands-on experience processing high-volume request data and analysing system performance under load. Eager to apply structured problem-solving and data-driven decision making to banking products as an analytics intern.

EDUCATION

Birla Institute of Technology, Mesra Aug. 2024 – May 2028
Bachelor of Technology in Computer Science | CGPA: 7.83 Mesra, Ranchi, India
Relevant Coursework: DBMS, Data Structures & Algorithms, OOP, Operating Systems, COA

Rajendra Vidyalaya & Ramkrishna Mission School
Class XII: 86.4% | Class X: 91.2% Jamshedpur, India

SKILLS

Data & Analysis: Python (pandas, scikit-learn), SQL, Excel, Predictive Modelling, Root-Cause Analysis
Programming: C++, Java, Go, C
CS Fundamentals: DBMS, Data Structures & Algorithms, OS, Distributed Systems, Concurrency
Tools: Git, GitHub, Redis, VS Code

PROJECTS

Bank Campaign Propensity Model & Targeting Strategy *(Python, scikit-learn, SQL, Excel)* 2026

- Analysed 41K+ bank telemarketing calls in Python and SQL to find conversion drivers across channel, timing, life stage and past response; past responders convert at 65% vs. an 11% average.
- Built a leakage-free propensity model (Gradient Boosting, ROC-AUC 0.82) on pre-call data; the top-scored 10% of customers convert at 4.7x the average.
- Designed a targeting strategy: calling only the top 30% reaches 74% of buyers with 70% fewer calls; built an Excel dashboard with a campaign-profit simulator.

Distributed Rate Limiter System *(Go, Redis, Lua)* 2026 – Present

- Built a distributed rate limiter that makes real-time allow/deny decisions on incoming traffic, staying consistent across multiple service instances.
- Implemented and compared token-bucket and sliding-window algorithms, sustaining 10K+ concurrent requests in load tests.
- Analysed load-test results to trace race conditions to their root cause; fixed them with Redis atomic operations, keeping average decision latency under 5 ms.

LEADERSHIP & EXPERIENCE

Robolution Club, BIT Mesra Aug. 2024 – Present
Sponsorship Team Lead (Robosaga 2026) & Technical Member Mesra, Ranchi, India

- Led sponsorship outreach for Robosaga 2026, pitching to and coordinating with external corporate partners and internal event teams.
- Built a Wi-Fi controlled ESP32 terrain-adaptive gripper robot (PWM motor control, servo gripper), tuning control parameters through iterative testing.

National Cadet Corps (NCC) 2024 – Present
Sergeant BIT Mesra

- Led and coordinated cadet activities within a structured command hierarchy, building leadership, discipline and teamwork.

ACHIEVEMENTS

- Solved 200+ DSA problems across arrays, trees, graphs, dynamic programming and greedy algorithms (Striver SDE Sheet).
